WAR PRODUCTION BOARD RECORDS, 1943 - 1945  
(Watches including Clocks and Timers)  
(2.3 cubic feet; 0.065 cubic meter; 7 DB)  

HISTORY¹ 

The War Production Board (WPB) was established in the Office for Emergency Management by an Executive order of January 16, 1942, which transferred to it the functions of the Supply Priorities and Allocations Board and the Office of Production Management (both established in 1941).  

The function of the WPB was to exercise general direction over the war procurement and production programs of all federal departments and agencies. The WPB was terminated November 3, 1945.  

The Consumers Durable Goods Division of the War Production Board was concerned with the regulation, production, and allocation of timepieces during World War II.  

(1) (Guide to the National Archives and Record Services, General Service Administration, Washington: 1974, PP. 687-689).  

SCOPE AND CONTENT  

This collection consists of records of the War Production Board concerning watches (including clocks and timers) so that both the civilian and the military would be supplied with adequate and reliable time mechanisms as well as timers for military purposes. The activities ranged from control over aspects of production to allocation of material used in manufacturing along with references to foreign importation of watches and a technical survey of clock and watch factories in Europe.  

PROVENANCE  

This collection was donated to the NMAH's Division of Mechanics sometime prior to 1974, and was transferred to the Archives Center shortly after it opened in 1983.  

For more information contact the Archives Center at archivescenter@si.edu or 202-633-3270
WAR PRODUCTION BOARD COLLECTION - WATCHES
(including clocks & timers)
1943 - 1945

Series I: WATCHES by TYPE
